

## Performance Wrap

We are an industry pioneer for oriented, high-strength hand wrap films. Our commitment to innovation has kept us a leader in stretch film technology for over 40 years, with next generation solutions helping our customers do more with less.

## WINLOCK® is an Oriented Hand Wrap

WINLOCK is the next generation of oriented hand wrap material. It offers exceptional strength in addition to performance features designed to improve load holding force and user efficiency, all while reducing cost and waste. WINLOCK is the ideal solution for wrapping challenging loads. Its balance of stiffness and tear resistance ensure that your product is locked-in and protected throughout the storage and shipping process.

### Features

- Oriented film
- Folded outside edges
- Performance resin blend
- Low-gauge, lightweight rolls
- Lightweight core or coreless options

### Benefits

- Use less material versus conventional hand wraps
- Helps enable user to apply consistent wrapping force
- Reduces “neck down” during wrapping to allow full use of the film’s width
- Prevents roll damage and wasted material
- Superior puncture and tear resistance even at low gauges
- Easy to handle and use for improved wrapping efficiency

## WINLOCK® Lightweight Core

WINLOCK hand wrap, supplied on lightweight cores, is not only strong and easy to use, but also helps reduce the amount of corrugated material your facility sends through the waste stream.

Part No.	Description	Weight per Roll or Case	Rolls per Case	Gauge	Width (in)	Length (ft)	Rolls per Pallet

## WINLOCK® Coreless

Coreless WINLOCK offers even greater savings in weight, efficiency, and waste reduction. Customers using 10 pallets per month of typical hand wrap can expect to remove approximately 4.8 tons of corrugate materials from the waste stream by switching to WINLOCK coreless.

Part No.	Description	Weight per Roll or Case	Rolls per Case	Gauge	Width (in)	Length (ft)	Rolls per Pallet
